

Audio System not working after car servicing

Escrito por MichaelMorin - 24/04/2018 04:03

Hi,

I had given my car for servicing but after taking it back I find that my music system is not working. The HU comes on but the speakers don't work. So I checked the AMP and see that it is not getting on. The fuse and wiring seems to be ok, what could be the reason?

Please help.

I didn't find the right solution from the Internet.
