

Silent(ish) TKL Mechanical Keyboard?

Escrito por MichaelMorin - 14/03/2018 09:50

Hi,

I'm looking to get a new keyboard that is TKL in order to save on desk space. However, I'm also looking for something that is pretty quiet (and mechanical of course lol). I currently use the Logitech G810 w/ Romer G switches which is pretty good, and not super loud, but it's not TKL. I know Logitech has other TKL keyboards with the Romer Gs, but I was just curious if there are any other options out there?

Please help.

I didn't find the right solution from the Internet.
