Broken laptop hinge
Escrito por MichaelMorin - 24/04/2018 04:01

Hello,

So, I closed my laptop and after 10 minutes decided to open it again but I heard something cracking and stopped and decided to look what's happening, apparently my left hinge is somehow stuck to the keyboard and I can't raise the screen anymore... I have an Acer Aspire VX 15

Please help.

I didn't find the right solution from the Internet.
