Vould a non profit medical insurance company work? scrito por Jessebarker - 01/06/2018 09:09
li,
Ifter learning about Nataline Sarkisyan, it got me thinking about other ways to possibly solve, ok, to ossible alleviate the problem of healthcare in the US. Cigna is a for profit company so they make noney but bringing money in and not paying money out. Since this is healthcare, this results in people ying. Well, what if the profit motive was removed/reduced? Would that possibly help? If not, why rouldn't it help?
Please help.
didn't find the right solution from the Internet.
