## Is there a way that the effect should be permanent ???
Escrito por crowek - 06/07/2018 07:23

_____

Hello,

I connected a hard drive through a USB Connector and it showed health of 50% in the HDD Sentinel 5.01 PRO. After that I clicked on the S.M.A.R.T option and change the attributes of Reallocated Sectors Count and Ultra ATA CRC Error Count so the hard drive showed me health of 100% and it showed that you should purchase this version to make permanent changes or otherwise whenever it is restarted it will go back again to the same health so I paid for the software and activated it by the key provided but when I checked the same hard drive in other computer with unregistered version of HDD Sentinel PRO 5.01 so it was showing the same health of 50% so my question over here that if we change attributes of S.M.A.R.T so they should be changed permanently and show the same health of 100% in other computers and HDD Sentinel Programs also.

Please let me know is there a way that the effect should be permanent and it shows the same on any version of HDD Sentinel Pro and any computer used.

Please help.

I didn't find the right solution from the internet.
