Hello,

I'm on social issues in healthcare taq 1 and I'm so stuck, you have to write a short essay on the identification of key milestones in the development of social care, an outline of the development of health and social care provision and analysis of the main changes, an explanation of the relationship between social factors and health care... I just can't seem to get going I've wrote my intro but don't even know what to write about any help.

Please help

I didn't find the right solution from the internet.
