

insurance metal homes

Escrito por deprussell123 - 26/07/2018 12:33

Hello,

I've built a new metal building -brand name- and had a custom carpenter finish the inside for a new home. The home is now finished and I went to get quotes for home owners insurance. I built one like this in Texas on a airport, hanger/home, very nice home, and had no problem insuring it. Farmers insured it, but will not do it here in Oklahoma. Tried other companies with little success. The home is on the edge of a small town, 1000' to fire hydrant and 4 blocks from fire Dept. -meets all city codes-elec-plumbing-etc. so it is not in a remote area. Agents are surprised also at not being able to get coverage, they submit for a policy and are rejected due to companies do not cover "metal homes". Would appreciate any suggestions on what to do, maybe different class or different underwriters. I just couldn't believe this would be a problem. Any ideas will be appreciated.

Please help

I didn't find the right solution from the internet.
